Marsh | amazon

24/7 online access: As a business owner, we understand your time is valuable. That's why we've developed an online experience where you can access policy information, important documents and your personalized dashboard, all in one place, anytime its' convenient for you!

Marsh DSP Insurance Program:
Simplifying insurance through online capabilities

Our teams are working hard and are committed to ensuring your options to manage your insurance online are simple and easy!

View vehicles: View your active vehicle information all in one easy and convenient location. We have worked with Amazon to get regular updates for your active vehicle information from the Amazon Fleet Tool so you only have to maintain your fleet data in one easy location. This feature provides a simplified view of your full active fleet – including branded and rental vehicles.

Access and download important policy documents all located in one convenient location!

Certificates of Insurance (COIs): Generate a COI for any rental company on demand. Enter the name and address of the rental company requesting a COI and download it immediately.

Fleet ID cards: Download to print your Fleet ID cards for each state your vehicles are registered in. This provides proof of insurance while on the road.

Billing breakdown: Provided after your monthly statement is available, this document shows a summary of charges for the current installment per policy (AL, GL, WC), list of vehicles per station and the date VINs were added/removed and a total charge for that statement per vehicles. This document provides you with transparency into your bill each month. We recommend you review this document each month and if there is anything that raises questions for you, feel free to contact a member of your dedicated regional account team.

Secure coverage all online: Whether you are new to the program, have been with Marsh before, or are renewing your policies, you can purchase insurance all online in a few easy steps. If you currently have policies with Marsh, your renewal quotes will automatically populate once you log in for you to review and bind at the time of renewal.

Performance dashboard: Access your customized performance dashboard where you can see your policy summary, claim counts, claims costs and more! You can learn what factors influence your insurance rates, and find tips to improve on the factors that you can control, like safety and claims.
